

EXCAVATOR STEP: CAN BE FOLDED UP AND DOWN

Convenient entry and exit into and out of the cab is also ensured by ECHLE's latest step, which can be folded up and down in no time at all. The special feature of this variant is that the step can be locked in three positions: **it can be folded up, out and down.**

When **folded up**, the step can also be secured with a padlock, which additionally blocks access to the cab. When **folded down**, however, the cab door can also be opened easily during a machine transport.

Installation is carried out using previously inserted threads or welded-on parts on the superstructure frame, to which the step is then attached. The mounting material is included in the set.

Technical Data

Possible step lengths	700 mm / 800 mm / 900 mm / 1,000 mm / 1,200 mm
Step width	240 mm
Overhang folded out	approx. 350 mm
Overhang folded up / down	approx. 90 mm
Weight	approx. 18 kg
Self-locking (in all positions)	✓
Anti-slip (executed)	✓
Mounting material incl.	✓
Lockable	✓
