

THE NEW CABIN GUARD: PROTECTOR E4

The PROTECTOR E4 from ECHLE is the latest generation of cabin protection structures against falling objects (FOPS). This protection combines the advantages of previous variants in one product and offers additional functionality.

For work where no FOPS is required, the front guard can be removed from the main field of view using the gas pressure spring-assisted swivelling mechanism. This enables a clear view within a few seconds for nonhazardous work.

KEY FACTS:

- | | |
|---|--------------------|
| ✓ super flat topguard:
ca. 40 mm installation height | > Patented |
| ✓ effortless swiveling:
EASY LIFT function | > Certified |
| ✓ optimum visibility | > Durable |
| ✓ easy cleaning | > made by
ECHLE |
| ✓ absolutely safe | |
| ✓ simple installation | |

In addition to proven and certified safety (CE/UKCA conformity), the focus is also on ergonomics and ease of use.

Highest quality made in Germany paired with an attractive design make the PROTECTOR E4 the ideal equipment for your universal-purpose machine.
